

# Project Report

- INTRODUCTION

- Project overview:

In this project, we use custom objects, relationships, page layouts to give the HR team easy access to data they need on an existing recruitment app.

To make the existing app more efficient for the HR team we create custom objects an relationships to store and access the data more efficiently. We install an unmanaged package in the org to get metadata that acts as existing data in the recruitment app.

We created a application, they are

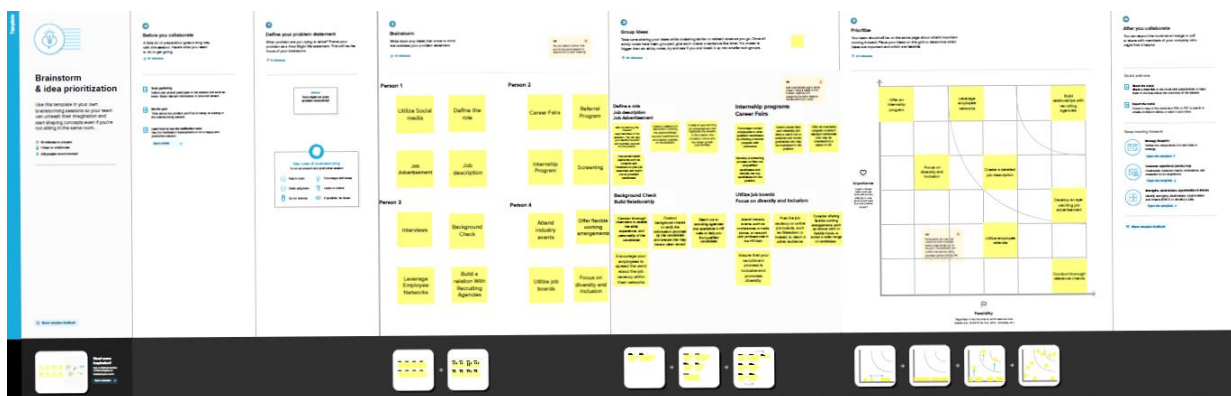

- Recruiting Developing App
- The Recruiting Developing app helps to store the records of Job Sites, Application, Candidate details

- Problem Definition and Design Thinking

## 2.1 Empathy map :

## 2.2 Ideation and Brainstorming map:

- Result

## Milestone 10: Creation of Permission Sets:

## Milestone 11: Creation of Reports:

#### 4. Trailhead Profile Public URL:

Team leader :

Team member 1:

Team member 2:

Team member 3:

#### 5. Advantage and Disadvantages

In this Salesforce we are prepare a Recruiting App for HR team easy to access data Reports. And it is very useful to easily take over the Level of Employee,Candidate,and their experience.And also take the Contact Address, Phone No., etc.....

#### 6. Application:

Our Apps is to be :

- All kinds of Job platform collaborate to access data,
- All type of Report Collecting from Companies,
- Etc.....

#### 7. Conclusion:

We create the objects with the help of Job Posting Sites, Review, and Job Posting Objects with the help of Salesforce app.And also create a App(Recruiting App) with the help of Salesforce.And then the objects are converted to Fields and then permission sets.Atlast Create

Profile as well as User and finished the creation of App. And the Final Reports(Job posting, Review) taken With help of Created app.

#### 8. Future Scope:

Ability to create a App.
